

Sterodair Wipes

Dairy Wet Towels for Cow Udder Disinfection

Technical Data Sheet

DESCRIPTION:

Sterodair Wipes are non-woven towels that have been soaked with a quick acting and effective disinfectant, formulated to destroy a wide range of microorganisms including pathogenic bacteria which cause mastitis.

Field tests around the world have shown that disinfecting the udder using Sterodair Wipes is extremely effective. These wipes will improve the health of your herd and decrease the damage the mastitis can cause.

At a cost of one pail per cow per year, the dairy farm can save hundreds of dollars per cow which is the average amount studies have confirmed that is lost to farmer due to mastitis damage.

FEATURES & BENEFITS:

- 4 in 1 action: Physical cleaning, Disinfectant of teat, Instant drying of Teat, Disinfection of Farmer's hand
- No residues in the milk
- Easy to Use
- Decreased milk somatic cell count – healthier herd
- Better pricing you receive for milk- better profit
- Proven cost savings results
- Available in economical refill pack.
- Proven cost saving results.

METHOD OF USE:

Remove a wipe from the dispenser. Wipe each one of the teats including the teat end. (For best results, the teat should be free of heavy dirt). Dispose the wipe and attach the milking machine. The next wipe is ready for disinfecting the next cow.

APPROVALS:

Sterodair Wipes are sold under private label or under Sterokem brand and are approved for use by many countries around the world.
